

SharePoint Migration Assessment

Spanish Point helps you migrate your entire enterprise environment, or granularly move files, lists, libraries, sites, site collections, workflows and more

SharePoint Migration Assessment

No matter how simple or complex your migration, our SharePoint migration assessment simplifies the process by helping your business move faster and without impacting your users.

Spanish Point helps you migrate your entire enterprise environment, or granularly move files, lists, libraries, sites, site collections, workflows and more. Spanish Point accompanies you throughout your migration project, to ensure your migration runs smoothly and to proactively manage your new environment.

The Migration Assessment is an in-depth analysis of your needs and current SharePoint infrastructure. We'll work with you to determine any new requirements to meet ongoing business objectives. Then, we'll define a migration plan tailored to your objectives.

The output of the Migration Assessment is a detailed report covering:

- Detailed report on "As Is" farm analysis including, version, licensing, servers, web applications, data sizes
- Analysis of the complexity for migration
- Recommended "To Be" architecture
- Recommended Migration Approach

Don't Hesitate – Get Ready to Migrate!

Migration assessments for your organisation can be arranged by calling on 01 652 2000, or send an email to sales@spanishpoint.ie
